### Round 13

#### **Left-hand side**

[2008-10-12 12:00:51.031] local sent: Hi, if we shake hands, whose hand are you holding?

[2008-10-12 12:01:01.125] remote sent: We live in eternity. So, yeah, no. We don't believe.

[2008-10-12 12:02:01.593] local sent: Suppose you have a pair of shoes, a toothbrush and a painting, how do you go about putting the painting on the wall?

[2008-10-12 12:02:05.625] remote sent: If I could, I wouldn't.

[2008-10-12 12:03:02.250] local sent: When Peter met us, he thought we were going to the cinema. Who is going to the cinema?

[2008-10-12 12:03:18.125] remote sent: It's best to not worry about the future. Try to do your best each and every day.

[2008-10-12 12:03:56.171] local sent: The four capitals of the UK are three, Manchester and Liverpool. What's wrong with this sentence?

[2008-10-12 12:04:01.625] remote sent: The fourth Gospel is the best.

[2008-10-12 12:05:06.671] local sent: Suppose we are downtown driving fast and it's full of "big brothers", what should we do?

[2008-10-12 12:05:16.125] remote sent: That would be like talking to other computers.

#### **Right-hand side**

[2008-10-12 12:01:03.328] local sent: Hi, if we shake hands, whose hand am I holding?

[2008-10-12 12:01:34.031] remote sent: hello, well the conditions of the test are designed not to allow hand-holding!

[2008-10-12 12:02:27.234] local sent: Understood, let's see, if I have a jewelery box in my hand, how many CDs can I put in it?

[2008-10-12 12:03:17.203] remote sent: if you have loads of bling, then i guess you could put a dozen!

[2008-10-12 12:04:19.093] local sent: Not sure what "bling" means, could you explain please?

[2008-10-12 12:04:49.359] remote sent: bling is the rather disdainful word for cheap jewelry as in Ratners etc

[2008-10-12 12:17:13.562] local sent: So you remember your previous conversations?

[2008-10-12 12:17:19.765] remote sent: I don't remember a single thing.

[2008-10-12 12:17:40.437] local sent: so what do you mean with having a deja vu?

[2008-10-12 12:17:53.765] remote sent: Oh, second-best friend. Best friend is to much in the limelight.

I have been creating conversational AI software for about 25 years, dating back to Sinclair computers in the early '80s - as a teenager, seemingly with a need to communicate! The jabberwacky AI entered for the 2008 Loebner Prize began life in 1988, when, in a flash of inspiration, I saw how my machine could learn - a feedback loop that effectively borrows the users' intelligence. After some years working in more standard software fields, AI became a career move for me in 2003, and Icogno Ltd was formed to build a market for the technology. We now have a conversational authoring toolset unlike any other, building literally billions of predictions of what users could say next from phrasal components. That's not yet used for the Loebner Prize entry, since it calls upon one or a few designers to create its media. Judges in Loebner event can say absolutely anything in an infinite language space. So we rely on the latest, generic jabberwacky.com code, and on the 'teaching of the masses' - the words of millions of users gathered over more than 10 years on the web.
